Syntel Champ Award

## OBJECTIVE

"Self-motivated team player seeking a position as a web developer where I can apply my knowledge of web design with my leadership abilities to meet client needs and exceed their expectations."

## PROJECTS

### My Portfolio

Technologies used:- HTML, CSS, JAVASCRIPT
Following keywords used to build this project.

Heading,Input types, Iframe tag, Buttons, Anchor tag, Image tag, Background Color.

I have used the Hamburger button to open the sidebar and cross button to hide the sidebar.Also I used "IF Else" statement to visible either Ham button or Cross button at a time. These buttons are working based on functions Toggle,Query selector, add event listener

Under the sidebar I have given multiple links using the Anchor Tags.

I have used iFrame Tag to display a web page within a web page.

I have created a button and inside that given a  Anchor Tag. I used "Target Attributes" to open the link in new tab.

I made creativity in buttons using the "Pseudo Selector" and Cursor.

I used the "Prompt" function to display the pop up message to the user.

I used "Input Type" keywords to get the data from the user.

To check and uncheck the box i used the "Checkbox".

I have used Heading Tags H1,H2,H3 etc

I have used the superscript tag to improve the date format

I have used the Margin,Padding, height, width to get the content in a very structural way on web page.

## EDUCATION
